The Property and Evidence Management course is intended to provide the attendee an understanding of today's property and evidence world with the view from the supervisor. Within the three days of this course of instruction, several topics will be covered from training and FTO programs to management quality control.

This class will stress and instruct high responsibility issues that are found in the field of property and evidence to include:

- Safety and Security
- Training and FTO Programs
- Scheduling hours and job descriptions
- Audits/Inspections and Spot checks

These topics can be very difficult to achieve and are normally checked by accreditation services but are normally neglected within property and evidence training. An open time will be given during the class so that attendees can compare procedures and policies as they refer to best practices.

A special block of instruction will also be given in liability subjects to include:

- Weapons
- Narcotics
- Money and high dollar items

Finally, newer technologies will be covered and discussed in depth so that the student can understand the relationship of these technologies and their place within the property and evidence unit. Technologies discussed include; hand held scanners and scan guns, bar code labeling and storage software, and understanding how the receipt and disposition of evidence is critical to a supervisor in charge. This course is also excellent for the P&E Specialist to prepare for assuming leadership roles within the P&E unit.

Instructor:

Larry Stringham of Tri-tech Forensics, has been connected with law enforcement since 1985 when he joined the US Air Force as a Security Policeman. Working with the USAF and later with the National Guard, Larry became a certified Police Officer in Little Rock Arkansas. In 1997, Larry became a Forensic Technician for the Cape Coral Police Department. Being promoted to supervisor of the Forensic Section in 2005, Larry now supervises nine employees and has increased the Department's viability by creating latent, computer, video, and lab units within the forensic section. Larry has an Associate's Degree in Criminal Justice and has testified as an expert in the fields of latent print identification, 10-print identification, and crime scene procedures to include forensic light sources, photography, scene processing and crime scene reconstruction.
