This 40-Hour class is designed for both law enforcement and fire personnel who are responsible for the investigation of fire related incidents. The class presents both the technical knowledge and scientific skills necessary to conduct a successful fire cause investigation and preparing an incendiary fire investigation for prosecution. The class includes classroom instruction and case studies to demonstrate investigative methods that can be applied to fire investigation.

The tested course follows the NFPA 921, Guide for Fire and Explosion Investigations, and NFPA 1033, Standard for Professional Qualifications for Fire Investigator.

Some of the topics covered include:

- Legal Aspects
- NFPA 921/1033
- Scientific Method
- Fire Dynamics
- Determining Area of Origin
- Electrical Systems and Appliances
- Interviewing
- Documenting the Scene/Reports
- Explosion Investigations

The class instructors are experienced Certified Fire Investigators and Professional Engineers who are active in the Fire Investigation Field. This class serves as a solid foundation for future Advanced Fire Investigation Training.

### **Instructor:**

Michael Quick retired in Dec 2012 after a 35-year Law Enforcement career, the last 25 years as an ATF Agent, serving as both a Certified Fire Investigator (CFI) and Certified Explosives Specialist (CES). He obtained his IAAI Certified Fire Investigator Certification and continued as a Fire Investigator, providing services to the insurance industry, conducting more than 2,000 fire investigations in the past 11 years. Mike served with both the ATF National Response Team (NRT) and International Response Team (IRT) and has coordinated and taught numerous fire and explosion related classes.
